

POND NETTING

Pond Netting; Natural Water Gardens recommends when netting your feature you use post anchors to attach a cable (rope, strings, nylon all stretch in time and sag) to stretch across length and/or width to maintain a height of at least 2-3 feet. This creates a tent with the net allowing leaves and other debris from collecting on the nets. Most leaves will fall off or can be removed with leaf blower or a rake. Be sure to anchor outside edge of net with plenty of stakes.

Air pump and re-circulating pipe have been added
For complete winterizing.

post at each end with cable between them, net is enclosed
At ends sides are stake to support the weigh of wet leaves

A greenhouse can be added for winter

nice and warm inside all winter
